# Parts Truck Delivery Schedule

## COMPLETE PARTS INVENTORY

Wyoming Machinery Company is committed to offering the best over-the-counter availability in the industry. We provide daily parts delivery to every single branch in our system.

## DAILY PARTS DELIVERY

We use a regional stocking philosophy that puts the part you need where you need it. If we don't have it in stock, depending on your location, almost 99% of parts will be available the next morning. How do we do it? The parts inventories of all four Wyoming Machinery Company locations, plus Caterpillar's Denver Distribution Center, become one huge supply source.

## ADDITIONAL SERVICES

In addition to parts distribution, Wyoming Machinery Company's regionally located specialized services such as our Component Rebuild Center and Fluid Analysis Lab become extensions of every Wyoming Machinery Company location.

Our expertise includes equipment management services, advanced technical support, emissions compliance solutions, on-site fluid analysis lab, rental and used inventory, Caterpillar-trained shop and field service technicians. We now provide on-site field welding and machining services. Talk to your Wyoming Machinery Company Sales Representative today or visit [www.wyomingcat.com](http://www.wyomingcat.com) for a complete list of services.

791 Latham Road - Lot A  
Wamsutter, WY 82901  
(307) 328-0660

Wyoming Machinery Company offers more than just excellent parts availability. We are the experts when it comes to Caterpillar® Equipment and we offer custom-tailored support to fit your operation. By using Wyoming Machinery Company's Customer Support Agreements (CSA), you can achieve lower operating costs, maintain the highest machine productivity, properly and easily dispose of waste oil and coolant, maintain comprehensive machine history and record keeping, and enjoy the convenience and savings of having additional repairs completed during scheduled CSA work.

#### **UNMATCHED SERVICE CAPABILITIES**

Wyoming Machinery Company's Component Rebuild Center (CRC) opened on September 13, 2002 and has received Caterpillar's highest contamination control rating. The CRC features component cleaning, a hydraulic shop, a machine shop, engine and transmission rebuilds and two double ended Taylor Dynamometers.

We feature Caterpillar trained shop and field service technicians and state-of-the-art repair facilities. We also offer state-wide field service, mobile lube service, large machine paint facilities, on-highway truck engine service and much more.

#### **FLUID ANALYSIS LAB**

Scheduled Oil Sampling identifies abnormal component wear by determining the amount of various elements in the oil from a particular compartment. This data is used to monitor component health and schedule maintenance. In addition to oil, our lab can evaluate fuel, hydraulic fluid and coolant for tell-tale wear particles.

#### **CUSTOMER SUPPORT AGREEMENTS**

Customer Support Agreements are parts and service agreements with established costs and availability guarantees. CSAs provide the customer with a low cost, efficient way to control equipment maintenance and extend machine life.

#### **PREVENTIVE MAINTENANCE AGREEMENTS**

One of the most effective ways to keep operating costs under control. We can formulate an agreement that places responsibility for preventive maintenance with our experienced technicians. In our shop or on your site, all services are performed to factory specifications.

#### **TOTAL MAINTENANCE AND REPAIR**

A Total Maintenance and Repair Agreement may be your best option for maximum productivity and cost savings. We can provide all maintenance and repair for a guaranteed cost per hour for a specified period of time.

Agreements are tailored to fit your situation and can range from simple Preventive Maintenance kits to sophisticated Total Performance Guarantees. A Total Maintenance and Repair Agreement can ensure that you achieve the longest possible life at the lowest possible cost.

##### **CASPER**

5300 Old W. Yellowstone  
(307) 472-1000

##### **GILLETTE**
